

IN THE CLAIMS:

Please withdraw claims 1-13, 16, 17, 19 and 20 without prejudice before calculation of fees.

Claims 1-13 (Withdrawn)

Claim 14. (Currently amended) A method of producing ophthalmic devices from the polymeric compositions produced through the polymerization of one or more aromatic-based siloxane macromonomers

wherein the R groups may be the same or different aromatic-based substituents;

R₁ is an aromatic-based substituent or an alkyl; x is a non-negative integer; and

y is a natural number, of claim 6, 7, 8 or 9 comprising:

casting one or more polymeric compositions in the form of a rod;

lathing or machining said rod into disks; and

lathing or machining said disks into ophthalmic devices.

Claim 15. (Currently amended) A method of producing ophthalmic devices from the polymeric compositions produced through the polymerization of one or more aromatic-based siloxane macromonomers

wherein the R groups may be the same or different aromatic-based substituents;
R₁ is an aromatic-based substituent or an alkyl; x is a non-negative integer; and y
is a natural number, of claim 6, 7, 8 or 9 comprising:

pouring one or more polymeric compositions into a mold prior to curing;
curing said one or more polymeric compositions; and
removing said one or more polymeric compositions from said mold
following curing thereof.

Claims 16 and 17 (Withdrawn)

Claim 18 (Currently amended) The method of claim 14, or 15, 21, 22, 23, 24, 25 or 26 wherein said ophthalmic device is a contact lens.

Claims 19 and 20 (Withdrawn)

Claim 21. (Re-presented formerly dependent claims 14 and 7): A method of producing ophthalmic devices from the polymeric compositions produced through the polymerization of one or more aromatic-based siloxane macromonomers

wherein the R groups may be the same or different aromatic-based substituents;

R₁ is an aromatic-based substituent or an alkyl; x is a non-negative integer; and

y is a natural number, of claim 6, 7, 8 or 9 with one or more non-siloxy aromatic based monomers comprising:

casting one or more polymeric compositions in the form of a rod;

lathing or machining said rod into disks; and

lathing or machining said disks into ophthalmic devices.

Claim 22. (Re-presented formerly dependent claims 14 and 8): A method of producing ophthalmic devices from the polymeric compositions produced through the polymerization of one or more aromatic-based siloxane macromonomers

wherein the R groups may be the same or different aromatic-based substituents;

R₁ is an aromatic-based substituent or an alkyl; x is a non-negative integer; and

y is a natural number, of claim 6, 7, 8 or 9 with one or more non- aromatic-based hydrophobic monomers comprising:

casting one or more polymeric compositions in the form of a rod;

lathing or machining said rod into disks; and

lathing or machining said disks into ophthalmic devices.

Claim 23. (Re-presented formerly dependent claims 14 and 9): A method of producing ophthalmic devices from the polymeric compositions produced through the polymerization of one or more aromatic-based siloxane macromonomers

wherein the R groups may be the same or different aromatic-based substituents;

R₁ is an aromatic-based substituent or an alkyl; x is a non-negative integer; and

y is a natural number, of claim 6, 7, 8 or 9 with one or more non-aromatic-based hydrophilic monomers comprising:

casting one or more polymeric compositions in the form of a rod;

lathing or machining said rod into disks; and

lathing or machining said disks into ophthalmic devices.

R₁ is an aromatic-based substituent or an alkyl; x is a non-negative integer; and y

pouring one or more polymeric compositions into a mold prior to curing;
curing said one or more polymeric compositions; and
removing said one or more polymeric compositions from said mold
following curing thereof.

Claim 25. (Re-presented formerly dependent claims 15 and 8): A method of producing ophthalmic devices from the polymeric compositions produced through the polymerization of one or more aromatic-based siloxane macromonomers

wherein the R groups may be the same or different aromatic-based substituents;

R₁ is an aromatic-based substituent or an alkyl; x is a non-negative integer; and y

is a natural number, of claim 6, 7, 8 or 9 with one or more non-aromatic-based

hydrophobic monomers comprising:

pouring one or more polymeric compositions into a mold prior to curing;

curing said one or more polymeric compositions; and

removing said one or more polymeric compositions from said mold

following curing thereof.

Claim 26. (Re-presented formerly dependent claims 15 and 9): A method of producing ophthalmic devices from the polymeric compositions produced through the polymerization of one or more aromatic-based siloxane macromonomers

wherein the R groups may be the same or different aromatic-based substituents;

R₁ is an aromatic-based substituent or an alkyl; x is a non-negative integer; and y

is a natural number, of claim 6, 7, 8 or 9 with one or more non-aromatic-based

hydrophilic monomers comprising:

pouring one or more polymeric compositions into a mold prior to curing;

curing said one or more polymeric compositions; and

removing said one or more polymeric compositions from said mold

following curing thereof.

Should there be any questions regarding this preliminary amendment,
please feel free to contact the undersigned at (636) 226-3340.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Rita D. Vacca", with a horizontal line extending from the end of the signature.
